Subject: Re: latest Dimock results?

Ed -- Here is the statement we issued earlier this afternoon:

EPA has completed and shared with residents and Pennsylvania state officials the second set of sampling at 20 private drinking water wells in Dimock, Pa. This set of sampling did not show levels of contaminants that would give EPA reason to take immediate action. EPA remains committed to providing Dimock residents with the best available data and information on the quality of drinking water as expeditiously as possible.

For more information on the sampling results, visit: <http://www.epa.gov/aboutepa/states/pa.html>

Subject: latest Dimock results?

Mr. Seneca,

Hearing here in DC that EPA has completed a second round of testing on Dimock wells and have advised residents of no findings that require action.

Can you confirm and elaborate? Have you put out a statement on this?

Also need info or a pointer on the duration of testing to be done, number of wells (is it 20?) and the frequency.

Cabot has put out their own statement, as you are probably aware.

Need whatever you have as soon as possible, for our evening edition.

Regards,
Ed
